REVOLT
SAGA

Unlock the
Future with
Crypto

Our Vision

“We aim to disrupt the gaming and investment worlds by creating a decentralized ecosystem that empowers players and investors alike. Our vision is to redefine entertainment through blockchain technology, turning every battle in Revolt Saga into an opportunity for growth, connection, and financial success. This is more than gaming—it’s the future of engagement and rewards.”

What Saga Revolt is Actually About?

Revolt Saga takes you into a dystopian world ruled by corrupt governments and oppressive systems. Your mission is to lead the revolution, battling armies, secret services, and elite forces in high-stakes combat. Every mission pushes your strategy and skill to the limit.

Thrilling Real-Time Battles

Experience fast-paced, real-time action where your decisions shape the outcome. From tactical skirmishes to large-scale battles, every encounter is a test of your ability to outthink and outmaneuver the opposition.

Progress With REVOLT Coins

As you play, use REVOLT coins to unlock characters, upgrade weapons, and access exclusive missions. These coins aren't just for the game—they carry real-world value, blending gaming with financial opportunity. (more on that later)

A Global Gaming Movement

Join millions of players worldwide in live events, tournaments, and collaborative challenges. Whether competing or teaming up, the game fosters a community that keeps the experience fresh and exciting.

A New Era in Gaming

Revolt Saga combines the excitement of gaming with the innovation of blockchain, rewarding your skill and time in unprecedented ways. This is more than a game. It's your chance to be part of a revolution.

Revolt Coin: The Heart of the Ecosystem

REVOLT coin is a multi-utility token that powers in-game purchases, unlocks exclusive content, and offers tangible value as a tradable asset.

Built on the high-speed Solana blockchain, REVOLT serves as both the in-game currency and a tradable asset. It plays a central role in the game's economy and offers significant investment opportunities for token holders.

In-Game Utility and Player Demand

REVOLT Coin is used for a variety of in-game purchases, creating a continuous demand cycle. Players spend coins to:

Buy Characters: Unlock unique heroes with special abilities, each offering advantages in missions and battles.

Upgrade Weapons: Improve firepower and efficiency with powerful weapon upgrades that increase player strength and chances of victory.

Access Exclusive Missions: Players can pay for premium missions with high rewards, encouraging frequent coin usage.

Special Events: Participate in exclusive live events and tournaments, where entry fees are paid in REVOLT coins, further circulating the token within the ecosystem.

Play To Earn: Players earn Revolt by completing missions, leveling up, or ranking in leaderboards. So if you don't have funds for investment, don't worry as you can earn tokens by simply playing the game.

Staking and Yield Farming: You can stake Revolt to earn rewards, including in-game perks (like rare items) or additional tokens. Special staking pools may provide access to early game content or NFTs.

Governance: You are not just an ordinary investor as you have a say in the project's decisions. Revolt holders can vote on key decisions (e.g., game updates, new features, tokenomic adjustments). The more tokens you hold, the more voting power you have.

As more players engage with the game, the demand for REVOLT coins will naturally increase, boosting its value over time. The continuous usage within the game, coupled with player progression provides a stable demand for the coin.

scarcity and Limited Supply

REVOLT Coin is designed with a limited supply to maintain its scarcity. Unlike other tokens with unlimited inflation potential, the fixed token supply creates an inherent value increase as demand rises.

This scarcity, combined with growing player participation, positions REVOLT Coin to become a deflationary asset over time, rewarding early investors as the coin becomes more sought after.

Revenue from Live Events and Tournaments

The coin will be used to enter global live events and tournaments that are key to the game's ecosystem. Players will pay entry fees in REVOLT coins, and prize pools will be paid out in the same token.

These high-stakes events will generate excitement, drawing new players and investors into the ecosystem, and further increasing token utility and demand. As tournaments grow in popularity and the community expands, the coin's value will rise due to the increased volume of transactions and engagement.

Token Value and Long-Term Investment Opportunities

REVOLT Coin offers a unique opportunity to gain exposure to both the gaming and blockchain sectors. With its use case firmly integrated into Revolt Saga, the token is positioned to appreciate as the game gains popularity.

Increased Token Demand: As more players join Revolt Saga, the demand for REVOLT coins to participate in the game's ecosystem grows, driving the price up.

Token Liquidity: Listed on multiple exchanges, REVOLT coins will have easy access to liquidity, enabling investors to trade or hold as an appreciating asset.

Ecosystem Expansion: The expansion of the game, along with the introduction of new features such as NFTs and exclusive content, will continue to fuel token demand, creating a growth cycle for investors to benefit from.

As the game's ecosystem grows, so does the potential for returns on your investment. The combination of in-game utility, scarcity, and increasing demand sets the stage for REVOLT Coin to become a valuable asset in the blockchain gaming world.

Built on Solana For Low Fee Gas & Faster Transactions

A high gas fee devours your profit and we know that very well. That’s why we have chosen a blockchain that not only provides faster transaction speed but also does it at a very nominal gas fee. Here’s why we have chosen Solana for this Revolt Saga.

Low Gas Fees: Affordable transactions for both players and investors.

Fast Throughput: Instant transaction processing for a smooth gaming experience.

High Scalability: Can support millions of users and transactions without compromising performance.

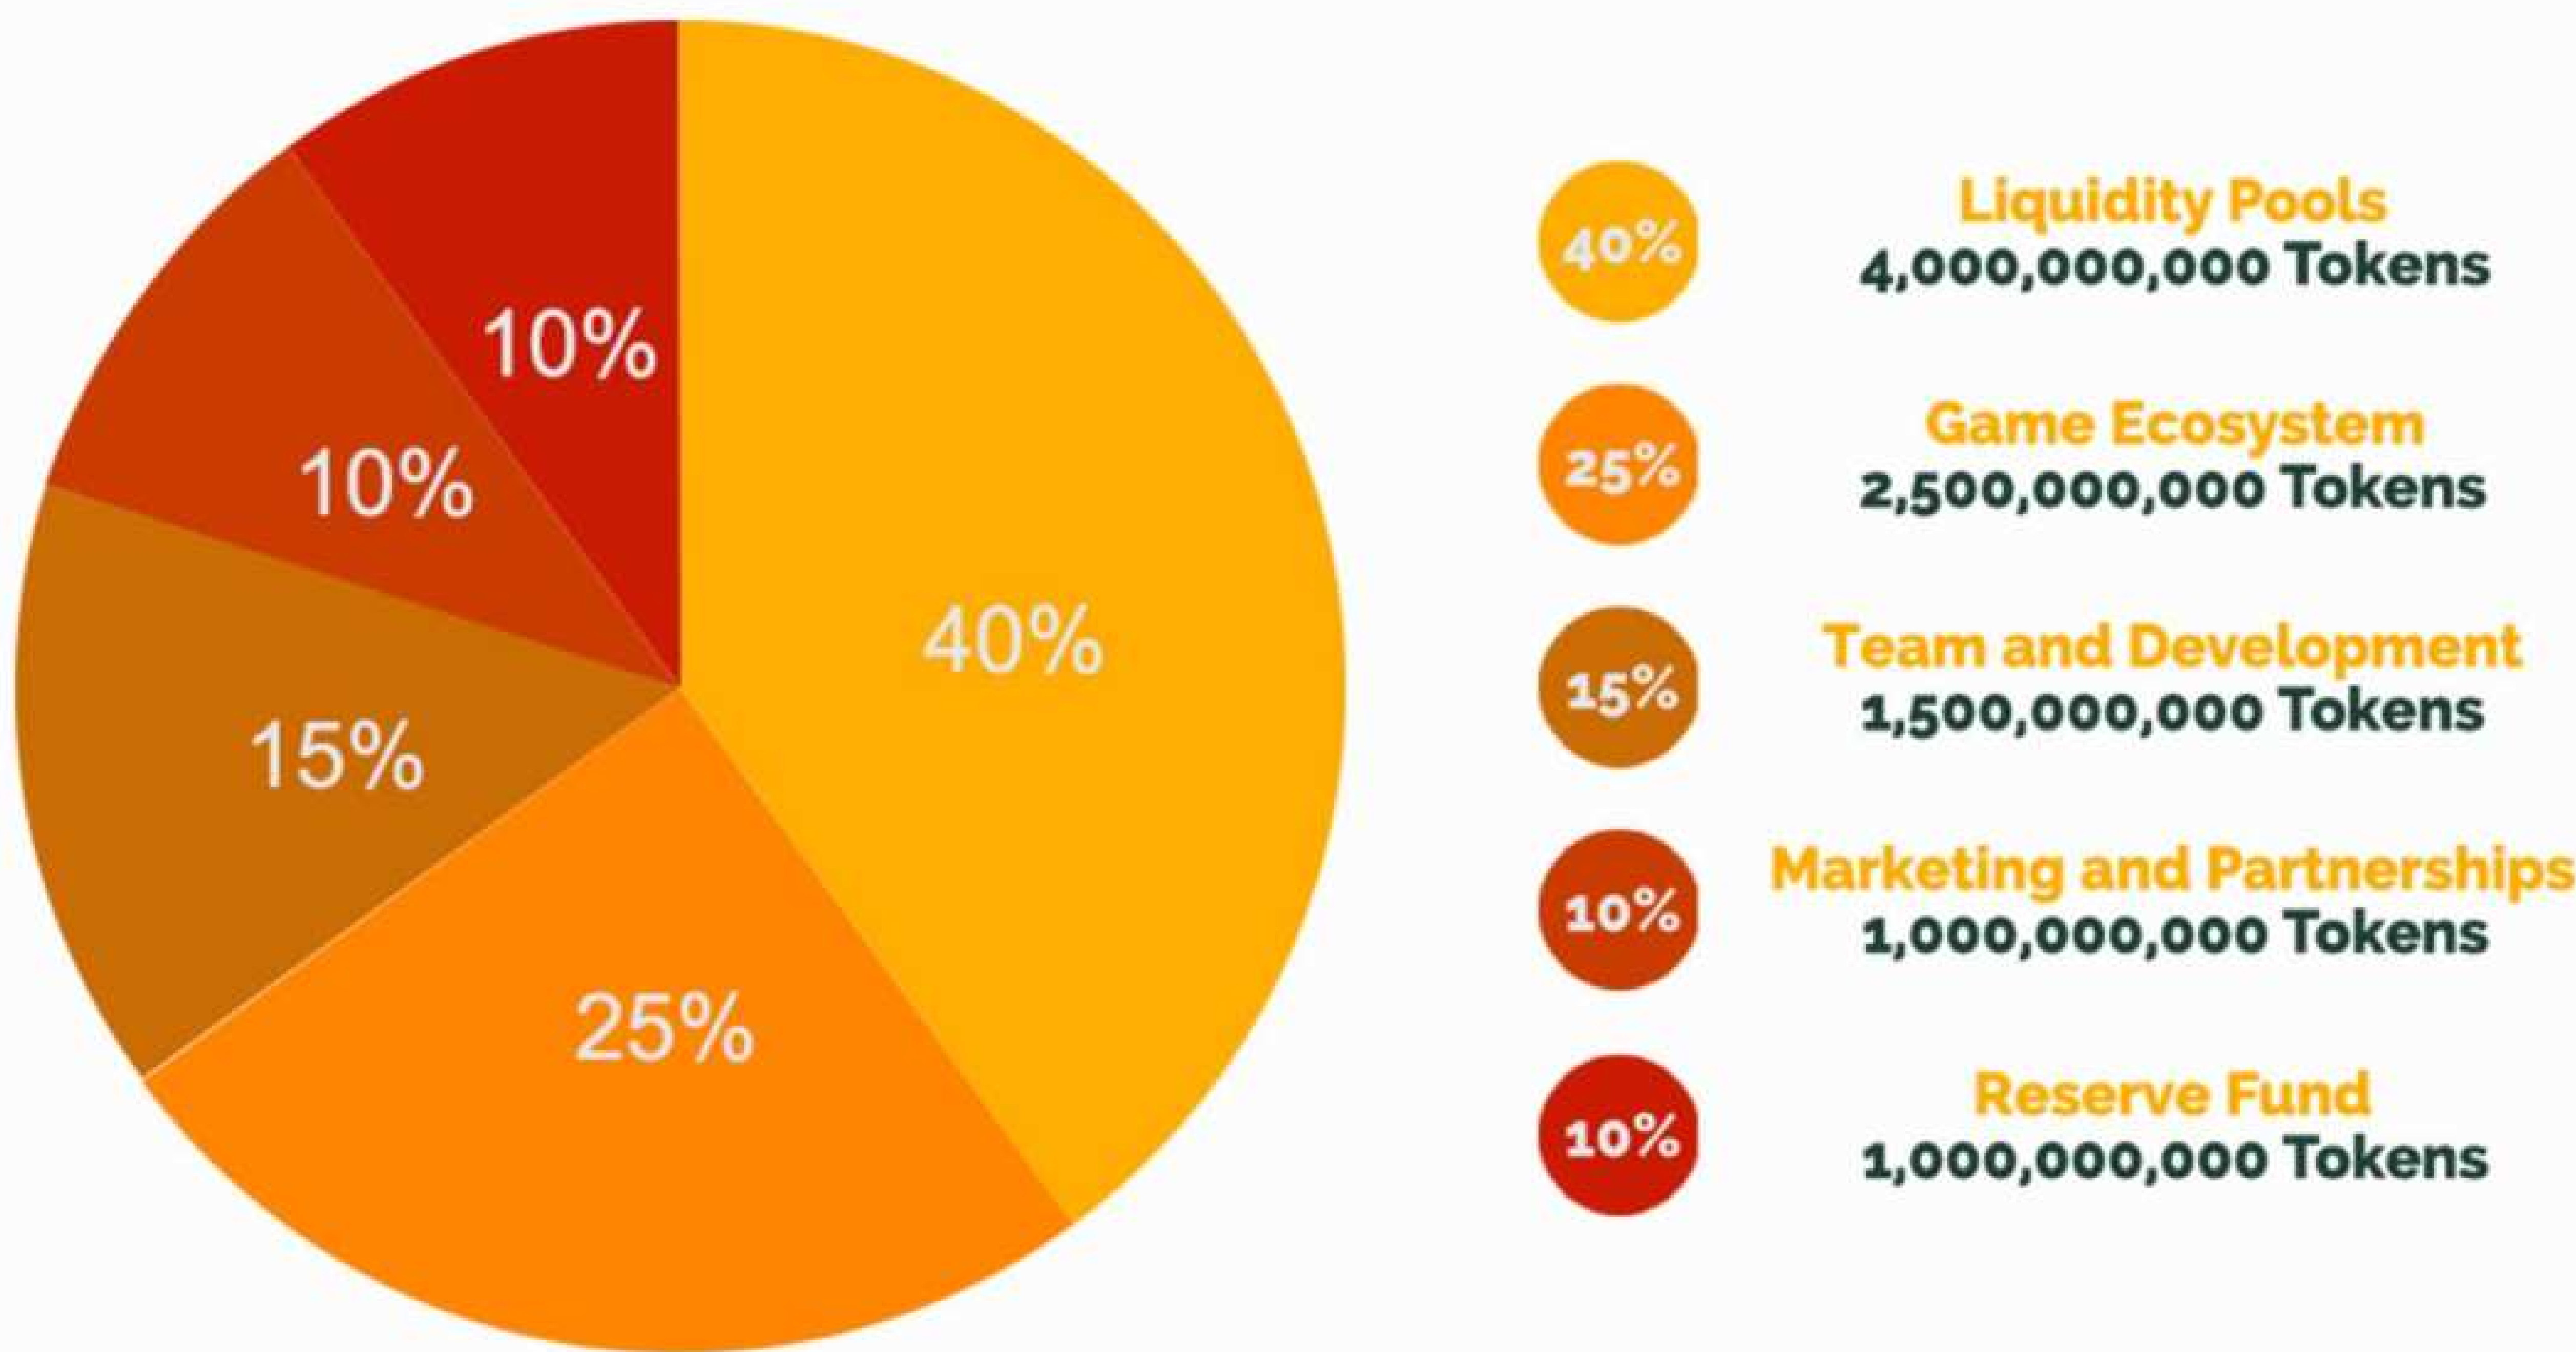

This combination of efficiency and scalability makes Solana the ideal choice for REVOLT.

Tokenomics

As tokenomics are the backbone of a project for its long term sustainability, we have taken every step to make them flawless. The distribution, supply, and utility of REVOLT Coin have been strategically designed to provide a balanced, scalable economy that benefits both players and investors.

Total Supply: 10 Billion Revolt

Token Distribution

45% Liquidity Pools

Allocated for decentralized exchanges (DEXs) like Raydium and Orca. Used for trading pairs e.g., Revolt/USDC, Revolt/SOL) and liquidity rewards.

25% Game Ecosystem

Reserved for the Revolt Saga game’s play-to-earn economy. Used for in-game rewards, competitions, and NFT drops. Released gradually post-July 2025.

15% Team and Development

Reserved for team salaries, server costs, and game development. Vesting period: Locked for 12 months, then released over 3 years.

10% Marketing and Partnerships

Funded for global marketing campaigns, influencer collaborations, and community rewards. Includes referral bonuses and exchange listings.

10% Reserve Fund

Set aside for unforeseen expenses, emergency liquidity, or future strategic initiatives.

Economic Model and Growth Strategy

For REVOLT to thrive in the long term, a solid economic model is crucial to sustain and scale the project. These carefully designed revenue streams fuel growth and provide continuous development to maximize value for both players and investors. Here's how the project plans to generate revenue:

In-Game Purchases

A major revenue stream for REVOLT Coin comes from in-game transactions. Players will regularly spend coins to:

Unlock characters

Upgrade weapons

Access premium missions and content

It provides a steady flow of REVOLT coins circulating within the ecosystem, directly contributing to the project's revenue and the appreciation of token value.

Transaction Fees

Every transaction made within the game, such as purchases, transfers, and market trades, will incur a small transaction fee. This fee generates passive revenue for the platform while maintaining low costs for players due to Solana's low gas fees.

Event & Tournament Entry Fees

Special live events, competitions, and tournaments will offer entry for REVOLT coins. The growing popularity of these events creates a dynamic source of income, while simultaneously driving demand for the token. Players who participate in events contribute to a larger economic cycle, boosting token utilization and generating consistent revenue.

Revenue Sharing with Partners

As the game expands, REVOLT will form strategic partnerships with gaming influencers, platforms, and media outlets. Revenue from these partnerships, including affiliate marketing and platform shares, will further support the growth of the ecosystem.

These revenue streams not only fuel the development of REVOLT but also create a self-sustaining model that drives long-term token value and provides consistent growth within the ecosystem. By diversifying income sources, the project positions itself for scalability, increased player engagement, and sustainable profits.

Roadmap

The roadmap is strategically designed to drive the success of both the REVOLT Token and the Revolt Saga game. Our phased approach provides steady growth, liquidity, and global engagement, paving the way for long-term sustainability and innovation.

Phase 1: Token Launch & Initial Liquidity (Jan–Mar 2025)

Jan 2025: Launch REVOLT, liquidity pool, staking rewards, and marketing.

Feb 2025: Expand trading pairs, and engage the community.

Mar 2025: Add more pairs, and finalize influencer deals.

Phase 2: Centralized Exchange Listings (Apr-Jun 2025)

Apr 2025: List on mid-tier CEXs, and launch campaigns.

May–Jun 2025: Boost liquidity, and explore bigger CEX listings.

Revolt Saga Game Development Roadmap

Phase 3: Game Development (Jul–Dec 2025)

Jul–Sep 2025: Build servers, recruit devs, and start core mechanics.

Oct–Dec 2025: Test mechanics, closed alpha, integrate NFTs.

Dec 2025: Game launch, P2E, live events.

Future Plans (2026 and Beyond)

Expand content and DLCs.

Partner with esports.

Cross-chain compatibility.

Launch more games.

Join The Revolution

REVOLT is more than just a game. It's a revolutionary ecosystem with long-term growth potential. With a solid economic model, low transaction fees, and strong token demand, REVOLT Coin is set to appreciate in value. The project offers unique opportunities for both players and investors, providing a thriving, sustainable future. Join the revolution and be part of the next era in gaming and digital currency.
